

Doosan Forklift Part

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international and intercontinental company that includes Defense Industry Products, Industrial Vehicles, Diesel Engines, Automation Systems, Machine Tools and Construction Equipment.

Their United States affiliate, Doosan Infracore America Corporation, situated in Suwanee, Georgia houses a 170,000 square foot production facility, home to a Compact Equipment and Construction division. Cleveland, Gilbert houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool department. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction consumer needs.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. Additionally, there are more than 90 independent dealers moving lift truck equipment and materials handling equipment. This network helps Doosan Infracore America to aggressively compete in this competitive market. The lift truck product line remarkably includes 63 different products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these various truck models vary from 3,000 to 33,000 lbs. All vehicles are built in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing forklift business in the North American market, due to their reliability in maintaining a high degree of client service quality and optimum product performance to all Doosan Infracore Lift Truck users. The U.S. forklift division located in Cleveland has a skilled team knowledgeable in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

At first the domestic lift truck market in Korea was an open import enterprise. Korea Machinery Co. Ltd. started in 1960, to import fully assembled forklifts as part of a domestic machinery expansion project. Sales of these goods were initially targeted to state-run firms, large scale businesses, and the military. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical education grew to become the new focus for enhancing quality and product development.

Daewoo started the first domestic lift truck business in 1967, and rapidly acquired a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's sophisticated technological advancements combined with sales success placed them in a situation of significant growth of their lift truck business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to assist them in the very competitive North American materials handling market. This project proved highly profitable for Daewoo and their lift truck product sales expanded greatly. In 1984, the company finished construction of a new facility to help in manufacturing high end value-added products for export. In 1993, the corporation had a global sales system and started exporting designs they had established through in-house expertise, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into overseas marketplaces.
