

Aerial Work Platforms

Aerial Work Platform - There are many accessories used for lift trucks that could be utilized to help expand the capabilities of your lift truck and allow you to pick up items, handle materials with greater ease or to complete clean-up tasks.

Several of the accessories are specially designed so as to fit on the forks themselves. Fork extensions for instance, are used whenever you need more blade length, which increases lifting capacity. Blade extensions come in lengths varying from 48-120 inches. Rounded or triangular accessories are one more kind used when transporting rolled material in order to ensure it does not roll off of the typical flat forks.

Examples of lifting attachments comprise pivoting and telescoping boom or crane accessories. They could come in several various styles and are normally meant for moving metal bars, lumber, poles and various types of bulky things. Other accessories like different styles of hooks and hook plates are obtainable to be able to carry things with a sling or chain. Magnetic lifters and slab lifters are other stuff which could be utilized together with hook attachments. Slab lifters are specialized accessories that are utilized for picking up a variety of materials which are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools which attach to your forklift to make moving rolls of carpet a lot easier. The attachment connects onto the forklift's forks and has a pole that goes through the middle of the carpet roll.

There are numerous other kinds of lift truck attachments which could be meant for facility maintenance like for example snow forks. These forks connect to front end loaders and could move materials like soil, snow and dirt. Other common cleanup accessories consist of magnetic sweepers and standard sweepers. Standard sweepers includes a broom which the forklift forks hook onto for sweeping large spaces like factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in areas where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths up to sixty inches and this surface area makes clean up fast and simple.

Material spreaders are other attachments used on forklifts. These spreaders are useful for various applications like spreading fertilizers, insecticides, seeds, ice melt, rock salt and pellets.

Another optional lifting attachment are work platforms. These could be utilized by many various companies day by day. Platforms may differ in size from 36" x 36" to up to 60" x 60". A few units may be existing and are capable of folding up and storing into a smaller place. Work platforms are designed to raise employees up to an overhead location making use of the lift truck. Larger platform models have extra space for personnel in order to carry tools and other necessary objects meant for the task. Usually work platforms are constructed of steel or ploy material.
