

Barrel Clamps

Barrel Clamps - Called "Barrel Clamp", this particular hydraulic accessory is used on forklifts in order to compress items that you need to transfer utilizing the forklift. Usually, they're utilized so as to paper rolls, barrels, and handle kegs, together with several barrel clamp designs having the ability to rotate the load. Like for example, the rotate function enables the person operating the forklift to insert a vertically stored paper into the horizontal intake of a printing press.
