

JLG Forklift Part

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove started out on a cross country RV trip. After spending numerous years establishing his family built crane company with his brother, John had no idea that this trip would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road trip.

All through their journey, John reacquainted himself with past business associates along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a considerable market for a product that could promptly and securely elevate individuals in the air to accomplish upkeep and other building functions.

After returning from their trip, John set up a partnership with two of his friends and obtained a metal fabrication business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty personnel, they produced and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design essentials of that original lift into current designs.

JLG lift trucks have come a ways since Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into different markets worldwide and develops new products to make sure customers are capable of being more efficient and perform in the workplace within a safer environment.
